### DSE bounces back but low turnover reflects investor hesitation

The Business Standard, June 23, 2026

- The benchmark index of the Dhaka Stock Exchange (DSE) rebounded today (23 June) after two consecutive sessions of decline, though falling turnover signalled that many investors remained on the sidelines.
- Market analysts said the recent price correction had created attractive entry points in fundamentally strong stocks, prompting fresh buying in select counters and pushing the index higher.
- Despite the recovery, overall sentiment remained cautious, with many participants adopting a wait-and-see approach as they assessed the market's near-term direction. Trading activity weakened accordingly, with turnover falling below the previous session's level.
- Gains were largely driven by buying interest in large-cap and fundamentally sound stocks, which offset selling pressure elsewhere. Analysts said continued accumulation of quality stocks could support further recovery, though subdued participation suggested investors remained wary of the broader market outlook.
- The DSEX index of the Dhaka Stock Exchange rose by 51 points to settle at 5,605 yesterday. The blue-chip DS30 index increased by 17 points to 2,127, while the Shariah-based DSES index advanced 10 points to 1,139.

### DSE serves query to Daffodil Computers following sharp price rise

The Business Standard, June 23, 2026

- The Dhaka Stock Exchange (DSE) served a query notice to Daffodil Computers, a listed IT firm, following recent unusual share price hike of the company.
- According to the data of the bourse, Daffodil Computer's share price surged nearly 24% between 8 and 21 June, reaching Tk162.2 per share. However, after the sharp rally, the stock came under selling pressure, causing its price to decline over the last two trading sessions.
- Finally, its shares closed at Tk155.5 each today (23 June), down by 1.04% over the previous trading session.
- Following the sharp rise in its share price, the DSE on 21 June sought an explanation from the company. In

DSE fines Tk5,000 daily for delayed financials

response to the query, the company today said there was no undisclosed price-sensitive information behind the recent unusual increase in its share price and trading volume.
- Daffodil Computers, one of the early technology companies listed on the stock exchange, remains a key entity within the Daffodil Group, which has diverse interests in IT, education, and media.

### Beximco Pharma declares 47.5% cash dividend, makesTk699.88cr profit in FY25

The Business Standard, June 23, 2026

- Beximco Pharmaceuticals recommended a 47.5% cash dividend to its shareholders for the fiscal year 2024-25 ended 30 June.
- The company declared the dividend at a board meeting held today (23 June), according to the company source.
- During the fiscal year, its consolidated net profit stood at Tk699.88 crore, which was Tk586.67 crore.
- To approve the audited financial statement and the dividend the company will set the annual general meeting time and venue following the High Court order. It also set the record date for 2 August.
- Besides, the company reported that its consolidated net profit stood at Tk704 crore in the first nine months of FY26.

### Beximco Pharma set to publish 15-month overdue financials as regulator allows special board meeting

The Business Standard, June 23, 2026

- The regulator has permitted the Beximco Group concern to hold a special board meeting to approve and publish its five overdue quarterly financial statements, mitigating the looming risk of a delisting from the London Stock Exchange (LSE).
- The pharmaceutical firm will hold a board of directors meeting on 23 June at 3 pm, according to a disclosure published yesterday.
- The trading of Beximco Pharma remained temporarily suspended on London's Alternative Investment Market (AIM) from 2 January 2026, as it failed to publish its annual financial results within the stipulated timeframe.
- According to rules, companies face potential delisting if they fail to publish their annual financial statements within six months of the fiscal year-end.
- Consequently, after its fiscal year ended in June 2025, Beximco failed to publish its annual corporate disclosures, leaving investors in the dark after having only released its half-yearly financials for FY25.

### Banks can now transfer consumer loans directly to vendors

The Daily Sun, June 23, 2026

- Bangladesh Bank (BB) has allowed banks to disburse certain consumer loans directly to vendors through electronic fund transfers, a move aimed at modernising loan settlement processes and reducing operational risks associated with paper-based transactions.
- The central bank issued a circular today permitting scheduled banks to transfer loan proceeds electronically to vendors in the case of auto loans, housing finance, consumer durable loans and loans for professionals.
- Previously, banks were required to make payments under these loan categories through pay orders or cheques issued in favour of vendors to ensure the proper utilisation of funds and prevent the diversion of loan proceeds.

- According to the central bank, the integration of digital payment systems alongside traditional instruments will improve operational efficiency, eliminate settlement delays, reduce transaction costs and mitigate risks related to paper-based payment instruments.
- The BB said digital disbursement would enable instantaneous fund transfers, accelerate asset delivery and create a more secure settlement process for banks, vendors and borrowers.

### Ctg Port posts record surplus despite global economic slowdown

The Financial Express, June 23, 2026

- Chittagong Port, Bangladesh's principal maritime gateway and a key driver of the country's external trade, has recorded strong growth in revenue, cargo handling and container throughput despite continuing uncertainty in the global economy.
- According to data released by the Chittagong Port Authority (CPA), the port generated a revenue surplus of Tk 42.87 billion during the first 11 months of fiscal year 2025-26, marking a sharp increase from previous years. After taxes and other statutory payments, the net surplus stood at Tk 22.28 billion.
- Port officials attributed the strong performance to improved operational efficiency, cost-control measures, infrastructure upgrades and the introduction of user-friendly policies aimed at enhancing service quality and increasing port capacity.
- Between July 2025 and May 2026, the port earned Tk 60.77 billion in revenue, up from Tk 49.52 billion during the corresponding period a year earlier, representing growth of more than 22 per cent.
- An analysis of the port's financial performance over the past five years shows a steady rise in revenue surpluses. In 2025, the CPA recorded revenue of Tk 54.60 billion against expenditure of Tk 23.18 billion, resulting in a surplus of Tk 31.43 billion—the highest annual figure at the time.

### Oil falls 1%

The Daily Star, June 23, 2026

- Oil prices fell more than 1 percent on Tuesday, extending losses from the previous session, on signs of some progress in restoring crude flows through the Strait of Hormuz following US-Iran peace talks.
- Brent crude futures fell $1.09, or 1.4 percent, to $76.81 a barrel and US West Texas Intermediate declined to $72.99 a barrel, down 87 cents, or 1.2 percent, as of 0607 GMT.
- Prices fell more than 3 percent on Monday after the United States granted Iran a 60-day sanctions waiver following initial peace talks, and as officials reported a lull in hostilities in Lebanon under the broader agreement.
- “The gradual increase in oil flows through the Strait of Hormuz continues to weigh on the market,” said ING analysts in a note. Two crude tankers with just under 2 million barrels of oil sailed through the Strait of Hormuz on Monday, ship-tracking data showed, in a sign that traffic was picking up following weaker flows on Sunday due to concerns over passage through the waterway.SK Hynix’s rise marks the culmination of one of the biggest turnarounds in South Korea’s corporate history. In 2002, then-Hynix Semiconductor was on the verge of being sold to Micron, having been crippled by debt accumulated during an aggressive expansion drive.
- The deal eventually fell through, leaving the company under creditor control for nearly a decade. Its shares plunged as low as 135 won in 2003, leaving it viewed as a penny stock, or “Dongjeon-ju” in Korean.
